

Invitation for Bid (IFB Comment and Review

Bid responses received for the if “Roofing and Facility Weatherproofing Related Services” were opened on October 29, 2003.

Responses were received from the following Bidders:

Weatherproofing Technologies, Inc.

The WTI-Tremco Bid was found to be very comprehensive and complete. TTI-Tremco has done an excellent job of breaking down the complex task of roofing and weatherproofing into individual tasks and then specifically pricing each individual task. NJPA Members (or more appropriately their Architects and Facility Engineers) should then be able to “Build their own cost estimate” by aggregating the individual tasks needed for their particular job. The bid pricing appears to be very competitive in this market place.
